# Digitising the 'Collection' & 'Reporting' of the new quality of life and experience indicators.

## 3 tasks where automation is required

Collection | Recording | Reporting

## Risks of data collection without automation

**Sending and tracking proxy** completion of surveys

**Mechanism to record anonymous response** so no impact to score

**Limited visibility** over progress of collection

**Inability for exec teams** to see homes at risk

**Significant time to collate** the resident data

**Manual pivot table required** to record scores in the required format

## Introducing the new NQIP ready app and dashboard

A platform that saves you

**Time** | **Money** | **Effort**

## The workflow of our solution

Daily 'To-do' list for a seamless collection process

Mapped to the quality standards

Real time reporting for NQIP progress

My Aged Care ready templates, no need for manual reporting

## Automate the indicators that you can and save time.
